

# Exhibitor Showcase

Make plans now to visit the exhibit hall and experience the innovative equipment and technologies you heard about during the education sessions. Here's a look at what will be on display. The shaded companies are showcase sponsors, you'll see more from them soon.

**ACOUSTICAL CONTROL LLC ..... #717**  
[www.acousticalcontrol-llc.com](http://www.acousticalcontrol-llc.com)

Acoustical Control provides sound mitigation for the HDD, oil and gas, and construction industries. Our products include temporary sound walls and permanent walls and buildings. We also offer all needed acoustical consulting and monitoring services, such as sound studies, modeling, etc.

**AEGION-INSITUFORM TECHNOLOGIES LLC-UNDERGROUND SOLUTIONS INC. .... #707**  
[www.aegion.com](http://www.aegion.com)

Aegion continues to advance the pipeline rehabilitation market by offering the latest innovations in cured-in-place pipe (CIPP) technology specifically engineered for drinking water applications. The InsituMain™ System, our showcase CIPP innovation for pressure pipe renewal, is a composite material of polyester fiber, fiberglass, and a specially formulated epoxy resin system.

**AKKERMAN INC. .... #715**  
[www.akkerman.com](http://www.akkerman.com)

The Akkerman 240A GBM System is the most trusted and versatile pilot tube system available in the industry. Capable of adapting to all manufacturers auger boring machines, these systems provide exact line and grade guidance for casing installs performed by conventional auger boring or pneumatic pipe ramming methods.

**AP SENSING AMERICAS ..... #730**  
[www.apsensing.com](http://www.apsensing.com)

AP Sensing, leading provider of DTS (Distributed Temperature) & DAS (Distributed Acoustic) solutions for transmission networks. Optical Fiber Monitoring of high-voltage power cables allows management & control of Thermal Status & Circuit Condition optimizing network performance at safe ampacity levels. • Hot Spot Detection • Condition Assessment • Third-party Interference (Dig-In, TPI) • RTTR (Real Time Thermal Rating)

**APPLIED FELTS-MAXLINER-FERRATEX ..... #527**  
[www.maxlinerusa.com](http://www.maxlinerusa.com)

Using only the highest quality raw materials available, Applied Felts manufactures based on your unique job requirements. Our vertically integrated offering of classic felt liners includes flame-bonded, highly durable PU and PP coated liners for more extreme environmental and procedure requirements. They provide maximum flexibility in the field. Our hybrid fiberglass liners provide the strongest, most robust liner on the market today for gravity sewer, pressure pipe and potable water applications

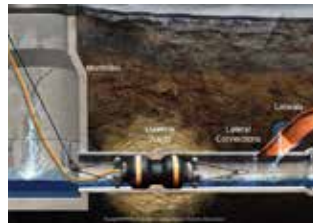

**ATLANTIC SUPPLY ..... #407**  
[www.atlanticsupply.com](http://www.atlanticsupply.com)

For a fast and easy way to pull back pipe up to 12', try Melfred Borzall's SD

Housing. It gives you the HDD-specific system when you need to quickly ream without taking the drill head off. Whether you are using an Eagle Claw for hard ground or a dirt blade, we have the solution for increasing your production.

**AVANTI INTERNATIONAL ..... #436**  
[www.avantigrout.com](http://www.avantigrout.com)

AV-100 Chemical Grout is an ultra-low viscosity, chemically reactive gel used to stop leaks, stabilize soil and control groundwater, by creating a long-lasting water barrier and superb soil stabilization. AV-100 has been successfully used for over 40 years to rehabilitate municipal sanitary sewer collection systems by eliminating infiltration in manholes, mainlines, laterals and lateral connections.

**BALLANTINE ..... #625**  
[www.ballantineinc.com](http://www.ballantineinc.com)

**BESTOLIFE CORPORATION ..... #636**  
[www.bestolife.com](http://www.bestolife.com)

STINGER® brand HDD thread compounds from BESTOLIFE® provide directional drilling and water well contractors with performance they can rely on in the harshest conditions. Our thread compounds come in four formulas – HDD, HDD-ALL SEASON, ENVIRO and WATER WELL – and are specially formulated for use on all HDD applications and water well drilling.

**BROWNLINE USA INC ..... #615**  
[www.drillguide.com](http://www.drillguide.com)

Brownline's Drillguide Gyroscopic Steering Systems integrate highly stable and accurate True North seeking fiber optic gyroscopes and specialized software that are not affected by outside influence. The systems can be operated independently, or, equipped with the Drillguide Radar Systems for the performance of hole-to-hole intersect and secondary tracking operations.

**BUCKHORN PUMPS INC ..... #525**  
[www.buckhornpumps.com](http://www.buckhornpumps.com)

**BUZZI UNICEM USA INC ..... #217**  
[www.buzziunicemusa.com](http://www.buzziunicemusa.com)

**CCI PIPING SYSTEMS ..... #410A**  
[www.ccipipe.com](http://www.ccipipe.com)

WrapidSeal™ manhole encapsulation system consists of an engineered primer and a unique, wrap-around, heat-shrinkable sleeve designed specifically to seal joints and prevent groundwater from entering a collection system. WrapidSeal™ can be utilized on both new construction and rehabilitation of existing manholes.

**CHANNELINE INTERNATIONAL ..... #409**  
[www.channeline-international.com](http://www.channeline-international.com)

# UCT Exhibitor Showcase

**COLUMBIA SOUTHERN UNIVERSITY** ..... #620  
[www.columbiasouthern.edu](http://www.columbiasouthern.edu)

Columbia Southern University is a recognized leader in occupational safety & health and environmental education. Taught by experienced safety experts, CSU's bachelor's and master's programs in Occupational Safety and Health, including our NEW Construction Safety Concentration, are recognized by the Board of Certified Safety Professionals as a Graduate Safety Practitioner Qualified Academic Program.

**COMPOSITE ACCESS PRODUCTS (CAP)** ..... #410C  
[www.justcapthat.com](http://www.justcapthat.com)

CAP's affordable, traffic-rated, composite manhole cover and frame assemblies resist H2S corrosion, reduce inflow, contain odor, are 60% lighter, and remove the cause of manhole cover theft – scrap iron. Installing CAP assemblies is faster, safer, less costly, and easier. Use less labor to set manholes and more to lay pipe.

**CPM PIPELINES** ..... #521  
[www.cmpmpipelines.com](http://www.cmpmpipelines.com)

Innovative pressure pipe inspection, validation and rehabilitation that enables pipeline owners, managers and engineers to identify and predict pipeline leaks, anomalies and failures, prevent damage, and water loss in all material types, ferrous and non-ferrous. • Acquarius • Aquabrella • PipeScanner • Electro-magnetic bracelet probe • CCTV

**CRETEX SPECIALTY PRODUCTS** ..... #606  
[www.cretexseals.com](http://www.cretexseals.com)

The CreteX PRO-RING™, a solid, lightweight, watertight alternative to concrete grade adjustment rings and brick & mortar used to adjust manholes, catch basins and utility structures. H2S5-load-rated and passes ASTM C-1244 (vacuum test). Thicknesses from ¾" to 6" in round, square and rectangle. Angle rings are available to match the crown of the road.

**CUES INC.** ..... #403  
[www.cuesinc.com](http://www.cuesinc.com)

The best long-term defense against I&I of groundwater into structurally sound sewer systems is with a CUES grout vehicle-mounted system. CUES offers a full line of portable, truck, and trailer mounted grout rehabilitation systems for mainline, manhole, and lateral joint sealing with the latest CCTV equipment and decision support software for television inspection.

**DANBY PVC LINING** ..... #507  
[www.danbyrehab.com](http://www.danbyrehab.com)

Danby is a grout-in-place PVC liner used in rehab of pipes > 36" and any shape structure; arch, round or box shapes. Also used in precast pipe and cast-in-place structures. A structural solution designed

for 50+ years of life, H2S protection and improving hydraulic performance with minimum loss of diameter.

**DERRICK CORPORATION** ..... #622  
[www.derrick.com](http://www.derrick.com)

The Derrick® Hyperpool® shaker, combined with three-dimensional, API RP 13C compliant Pyramid Plus™ (PMD+) screens, is designed expressly to exceed the demanding needs of today's HDD operations. With its compact footprint, industry-leading processing capacity solids bypass prevention and low maintenance cost, the Hyperpool and PMD+ screens are well suited for HDD applications.

**DIGITAL CONTROL INC.** ..... #724  
[www.digital-control.com](http://www.digital-control.com)

The new DigiTrak Falcon+ line of HDD locating systems provides a worry-free and versatile solution that gets the job done without interruption. The TeraTrak™ R1 generates continuous job-site topography and gives you the vital data to create and update your bore plan on-the-fly, so it never becomes obsolete.

**DRILLRITE CHEM LLC** ..... #729  
[www.drillrite.net](http://www.drillrite.net)

**DSI UNDERGROUND** ..... #418  
[www.dsitunneling.com](http://www.dsitunneling.com)

**E&M SUPPLY GROUP** ..... #602  
[www.drillpipesupply.com](http://www.drillpipesupply.com)

E&M sells drill pipe, non-mags, and subs. We carry all sizes for all rigs. Our

specialty is 31" drill pipe for maxi-rigs, and we maintain the largest inventory in the industry. Come by our booth to meet our team and pickup a copy of our current inventory.

**EMAGINEERED SOLUTIONS INC.** . #332  
[www.theshooterccpp.com](http://www.theshooterccpp.com)

The SHOOTER® is the original continuous air-inversion machine for CIPP and for decades has been a standard in the trenchless

industry. Fast, reliable, mobile: THE SHOOTER® 12 with built-in lubrication system and knife gate for 4"-15" pipe using air, steam, water, and LED UV and the trailer-mounted THE SHOOTER® 24.

**ENGINEERED SPRAY SOLUTIONS LLC.** ..... #314  
[www.engineeredspraysolutions.com](http://www.engineeredspraysolutions.com)

**EQUIX, INC.** ..... #537  
[www.equixinc.com](http://www.equixinc.com)

Equix Integrity provides services to the water/wastewater collection systems industry, including both public and private sectors. Our team of professionals has decades of experience in the clean & TV inspection, sewer mainline and lateral joint grouting, manhole rehabilitation, CIPP repair and cross bore markets.

**GAJESKE INC.** ..... #405  
[www.gajeske.com](http://www.gajeske.com)

Gajeske Inc. product lines range from small- to large-diameter, high- and medium-density polyethylene pipe, fittings and accessories; to every size of McElroy fusion machines, which are available for sale or rent. Services include certified technicians and mechanics, custom fabrication, fusion and operator qualification, and safety training.

**HARD ROCK DIRECTIONAL DRILLING .....#614**  
[www.hardrockhdd.com](http://www.hardrockhdd.com)

Hard Rock is a leading provider of horizontal directional drilling (HDD) services. We provide a comprehensive range of services, including pre-bore profiling, bore design and utility infrastructure installation.

**HCSS .....#427**  
[www.hcss.com](http://www.hcss.com)

Use HeavyJob to track how your jobs are doing now, while you still have time to make changes that impact your bottom line. Connect your field and office to analyze daily job costs and compare actual production rates vs budget to ensure you're making money, not losing it.

**HERRENKNECHT TUNNELLING SYSTEMS .....#705**  
[www.herrenknecht.com/en/](http://www.herrenknecht.com/en/)

E-Power Pipe® is used for the trenchless installation of small-diameter product pipes at shallow depths. Over long distances of up to two kilometers, both pressure-resistant and non-pressure-resistant product pipes are installed quickly, safely and precisely. The two-stage process integrates aspects of the proven horizontal directional drilling (HDD) technology and pipe jacking (microtunnelling).

**HI-VAC CORPORATION .....#624**  
[www.hi-vac.com](http://www.hi-vac.com)

Our Aquatech™ trucks are for use in the cleaning of underground piping, catch basins, storm sewers, lift stations, and treatment plants. Our O'Brien® brand products are the jetter technology for municipalities and specialty contractors. X-Vac® products are known as an efficient method for locating underground utilities, exposing broken water lines, cleaning out potholes and vacuuming a wide range of materials.

**HK SOLUTIONS GROUP .....#437**  
[www.hksolutionsgroup.com](http://www.hksolutionsgroup.com)

Monoform Plus™ combines two proven technologies into a single system. It produces a manhole rehabilitation product providing a fully structural concrete manhole liner incorporating a HDPE thermoplastic protective membrane for use in highly corrosive industrial applications and sanitary sewer systems where MIC is present.

**HOBAS PIPE USA .....#514**  
[www.hobaspipe.com](http://www.hobaspipe.com)

Hobas Pipe USA, Inc. fiberglass reinforced polymer (FRP) products are manufactured for pressure and gravity applications, serving the

water, wastewater and power markets. Pipe sizes from 12" to 126" diameters with working pressures to 450 psi. Hobas manufacturing capabilities include structural circular and

non-circular pipes, manholes including fittings, standard and custom designs, like tees, reducers and bifurcations.

**HONEYWELL INTERNATIONAL..... #802**  
[www.honeywell.com](http://www.honeywell.com)

Honeywell's line locating services across all utilities brings you best-in-class equipment, data capture and digitalization of utility assets, while keeping everyone safe. By building an underground digital library, we provide stakeholders with accurate data and the opportunity to improve safety and prevent damages.

**HTS PIPE CONSULTANTS .....#516**  
[www.htspipeconsultants.com](http://www.htspipeconsultants.com)

HTS Pipe Consultants is a materials-testing and consulting firm specializing in cured-in-place vinyl ester, polyester, epoxy and glass fiber-reinforced resins. Services include the determination of flexural and tensile strength, flexural creep and chemical-resistance properties. All testing is performed in accordance with ASTM, Greenbook and ISO standards.

**INDUMAR PRODUCTS INC. ....#517**  
[www.indumar.com](http://www.indumar.com)

STOP IT® BoreShield™ ARO II is a field-applied abrasion-resistant outerwrap (ARO) consisting of a unique, heavy-duty fiberglass reinforcement and water-activated urethane resin, designed for impact and abrasion resistance in weld seam, pipeline, directional drilling, and piling applications. STOP IT® BoreShield™ System provides protection from external wear, abrasion and impact events in HDD applications.

**INFINITY TOOL MANUFACTURING...#718**  
[www.infinitytoolmfg.com](http://www.infinitytoolmfg.com)

Shark PDC Reamer is a rock reamer with replaceable cutters, enabling a rapid change of cutters onsite with hand tools, minimizing down time. Fit a new segment and be back up and running in minutes. Cutter segments are interchangeable; push & pull are available; and sizes range from 14" to 48" in diameter.

**INNOVATIONS AMPLIFIED .....#227**  
[www.innovationsam.com](http://www.innovationsam.com)

**INTERPLASTIC CORP. ....#524**  
[www.interplastic.com](http://www.interplastic.com)

ONEstep™ CIPP resin system is a patented system designed to be a simpler, safer process with a single liquid initiator. Its benefits include:

labor savings, safety, no need for mixing a dust or flake, requires no heating, and system working time minimizes premature liner gelation.

**LADTECH INC. ....#410B**  
[www.ladtech.com](http://www.ladtech.com)

Ladtech rings and catch basins are 100% recycled with fast, light weight installations that reduce labor costs. With a 100-year life expectancy that's designed to be impervious to hydrogen sulfide gas and is HS25 traffic rated.

# UCT Exhibitor Showcase

**LOGAN CLAY PRODUCTS LLC. ....#702**  
[www.loganclay.com](http://www.loganclay.com)

No-Dig Pipe® by Logan Clay Products (Vitrified Clay Jacking Pipe) is predominantly used with the pilot tube method of guided boring for installation of gravity sewers on-grade and on-target at depth and where open-cut is difficult or space is limited. Logan Clay Products 800-848-2141; no-digpipe.com

**LOGIBALL INC. .... #424**  
[www.logiball.com](http://www.logiball.com)

Logiball Test & Seal Lateral Packers are used to test the integrity of the lateral connection & a predetermined distance of the lateral, all from the mainline sewer access. If the air test fails, chemical grout is pumped and exits the pipe defects to seal off infiltration and stabilize the bedding soils adjacent to the pipe. Sealing distances can vary from the connection up to 30 feet.

**MADEWELL PRODUCTS CORP .....#402**  
[www.madewell.net](http://www.madewell.net)

The Mainstay® Composite Liner is a manhole rehabilitation system consisting of a high-strength restoration mortar (typically Mainstay ML-72) and an epoxy corrosion barrier coating (typically Mainstay DS-5) that cure simultaneously to repair and protect brick and concrete manholes, lift stations, wet wells, and other sanitary sewer structures.

**MARTLIN DISTRIBUTING LLC. ....#737**  
[www.martlindistributing.com](http://www.martlindistributing.com)

Power Pellets is a unique, stand-alone solidification product successful in managing liquid spoils destined for landfill. Only about 5% (by weight) of this patented product is required to manage cuttings, sediment and sludge containing up to 50% moisture. Power Pellets is a proven cycle costs reduction solution.

**MCELROY MANUFACTURING INC. ...#503**  
[www.mcelroy.com](http://www.mcelroy.com)

**DataLogger® 7**  
 Capture the most important data from your fusion job site – no matter how long the workday. The DataLogger 7 delivers increased battery life, automatic data backup, an updated Android operating system, and more, in a new, IP68-rated and MIL-STD-810 tested, rugged touchscreen tablet.

**MILLER PIPELINE .....#600**  
[www.millerpipeline.com](http://www.millerpipeline.com)

Miller Pipeline provides a comprehensive range of pipeline contracting and rehabilitation services for the natural gas, liquids, water and wastewater pipelines.

**MI-TECH SERVICES INC. ....#536**  
[www.mi-tech.us](http://www.mi-tech.us)

Mi-Tech performs design and testing services for the pipe rehabilitation and underground construction industries. Mi-Tech has a materials testing laboratory specializing in testing Cured-In-Place Pipe (CIPP). Mi-Tech's laboratory is Certified by the A2LA for ASTM & ISO Test Methods.

**NASSCO INC. ....#533**  
[www.nassco.org](http://www.nassco.org)

**NR REAMERS ..... #406**  
[www.nrreamers.us](http://www.nrreamers.us)

NR Reamers has over 50 years of experience in manufacturing drilling tools, with two locations serving the world with integrity and great tools. Products include drilling tools and products, roller cone reamers, PDC reamers, wedge reamers and crossover subs. Contact us at NRReamers.us

**NUFLOW TECHNOLOGIES .....#333**  
[www.nuflowtechnologies.com](http://www.nuflowtechnologies.com)

NuForce Pressurized CIPP is the most versatile potable-approved lining system in the world, structurally repairing high-pressure sewer and potable water mains with minimal disruption. Designed with a new generation of composite liners made of non-woven, needle punched staple fibers reinforced with ECR fiberglass, it withstands high burst pressure and offers high resistance to external loads.

**OBIC ..... #425**  
[www.obicproducts.com](http://www.obicproducts.com)

OBIC spray-applied coatings offer a variety of solutions that are customizable to meet the demands of even the most-challenging water or wastewater structure rehabilitation project. OBIC provides a one-stop shop to fit your need for no-dig sewer rehab from grouts to sewer coating, potable water, stormwater, structural and non-protection.

**OMEGA LINER COMPANY INC.... #637**  
[www.omegaulvpipe.com](http://www.omegaulvpipe.com)

The Omega UV Liner is constructed with ECR (corrosion-resistant) fiberglass and advanced UV resins – proven to be one of the strongest on the market. Omega Liners are manufactured using unsaturated polyester or vinyl ester resins for environmentally conscious projects and are offered from 6" (150mm) to 66" (1675mm).

**OX ONSITE ..... #807**  
[www.ox-onsite.com](http://www.ox-onsite.com)

We use the world's leading dry vac technology and we're one of the only service providers in North America offering it. This equipment is engineered to dig dry safely on large excavation projects without the complications and costs that occur when you add water to excavated materials.

**PERMALOK—A NORTHWEST PIPE COMPANY .....#534**  
[www.nwpipe.com](http://www.nwpipe.com)

Northwest Pipe Trenchless products include straight seam and spiral-weld steel pipe with a variety of end finishes, including six proprietary Permalok® interlocking joints that eliminate the need for field welds. We also offer high-quality reinforced concrete jacking pipe, and HDPE-lined trenchless Perfect Pipe and lined manholes by Geneva Pipe and Precast.

**PIONEER ONE INC. ....#714**  
[www.pioneeronehddp.com](http://www.pioneeronehddp.com)

While averaging 4000 feet per bit, our newly designed 2", along with our 3" and 4" HDD Air Hammers, run on a 200/400 compressor with ease. Save on your fuel bill and run a smaller compressor.

**PIPELINE RENEWAL TECHNOLOGIES .....#530**  
[www.pipelinet.com](http://www.pipelinet.com)

SpeedyLight+ is the LED-based solution for CIPP that expertly cures liners at speeds from 0.66 up to 3.3 fpm. Compatible with felt and invertible glass fiber, SpeedyLight+ can cure transitions, verticals and tricky 90-degree bends in lines from 4" up to 12" in diameter.

**PPG/RAVEN LINING SYSTEMS .....#706**  
[www.ravenlining.com](http://www.ravenlining.com)

**PRIME RESINS .....#422**  
[www.primeresins.com](http://www.primeresins.com)

PR10L ACLM is a super low viscosity acrylamide grout that yields a gel upon reaction. The grout solution is as thin as water, allowing PR10 to follow infiltrating water for sealing leaks or to deeply penetrate soils for soil stabilization. The gel time is adjustable from a few seconds to several hours. The cured grout provides an economical water barrier or soil stabilizer.

**PRISUM TECHNOLOGIES .....#518**  
[www.prisum.tech](http://www.prisum.tech)

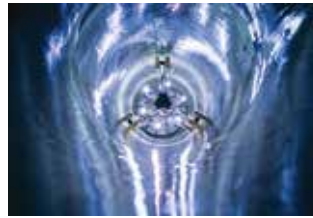

**PROKASRO SERVICES USA INC. ....#236**  
[www.prokasrousa.com](http://www.prokasrousa.com)

The KASRO UV CCU is a drum/control combination for 6" to 48" diameters. The KASRO UV light source chain 8 x 400W/600W and UV double cores 2 x 4 x 1000W can be operated to effectively cure GFP liners. The UV CCU is equipped with four wheels, making it mobile and compact, and easy to use even on difficult-to-reach construction sites. Operation, display and datalogging is possible via a 21" touchscreen PC.

**R-TEXTILES LLC .....#433**  
[www.r-textiles.com](http://www.r-textiles.com)

**SAERTEX MULTICOM LP .....#711**  
[www.saertex-multicom.com](http://www.saertex-multicom.com)

SAERTEX multiCom's UV-cured GRP lining products offer exceptional structural strength, resulting in thinner liners with increased hydraulic capabilities. Our liner technology offers optimal quality control with minimal equipment on site, minimal energy demand for curing, and reduced impact on the public. Applications include stormwater, wastewater, culverts and pressure pipes.

**SAUERIEISEN INC. ....#626**  
[www.sauereisen.com](http://www.sauereisen.com)

Sauereisen, Inc., is a 123-year-old, Pittsburgh-based manufacturer of corrosion-resistant materials of construction. We are experts in the prevention of corrosion and the restoration of structures compromised by corrosion. From collection systems to treatment facilities, Sauereisen offers materials to resist acidic environments and prevent l&l.

**SEALING SYSTEMS INC. ....#300**  
[www.ssissealingsystems.com](http://www.ssissealingsystems.com)

Introducing Flex-Seal 2.0® This all-purpose sealant adheres to many surfaces and has over 800% elongation. Flex-Seal 2.0 is designed to prevent inflow/infiltration and provide corrosion protection at the grade adjustment ring section or joint section of manholes and catch basins. Flex-Seal 2.0 is 100% safe and Prop 65 compliant!

**SEWPER COAT AN IMERYS BRAND .....#618**  
[www.sewpercoat.com](http://www.sewpercoat.com)

**SIPPTech .....#631**  
[www.sipptech.com](http://www.sipptech.com)

SippTech is revolutionizing pipe rehabilitation with manufactured-in-place composite pipe (MICP™). MICP is the only robotically installed composite lining system to meet the AWWA Class IV structural/Close Fit Lining (CFL) classification for large-diameter pressure pipes ranging from 48" to 96" with 250+ PSI working pressure capabilities.

**SITE 20/20 .....#415**  
[www.site2020.com](http://www.site2020.com)

**SPRAYROQ INC .....#417**  
[www.sprayroq.com](http://www.sprayroq.com)

SprayWall is a self-priming polyurethane lining that reinstates structural integrity while providing infiltration control and chemical resistance. SprayWall's quick curing time allows the newly protected structure to be returned to service shortly after the application is completed, making it ideal for use in wastewater, stormwater rehabilitation, and on DOT projects.

# UCT Exhibitor Showcase

## STANDARD CEMENT MATERIALS ...#526

[www.standardcement.com](http://www.standardcement.com)

4553® Epoxy Coating is a specialty coating system for brick, block, concrete or fiberglass manholes; manholes with force-main discharges, deteriorated pipes, and wastewater treatment plant structures exposed to harsh chemical environments. The 4553® Epoxy Coating over Reliner MSP® Cement may be [hand] applied, mixed with aggregate, to get a quick 24-hour, abrasion-resistant, structural repair in critical structures.

## STRUCTURAL TECHNOLOGIES .....#303

[www.structuraltechnologies.com](http://www.structuraltechnologies.com)

Structural Technologies' StrongPIPE® product line is a comprehensive suite of strengthening and protection systems for medium- to large-diameter pipelines. These products repair and renew all types of pipelines, including concrete, metallic and polymer-based. The StrongPIPE® product line can provide solutions in various markets, such as water/wastewater, industrial and nuclear.

## SUNBELT RENTALS .....#619

[www.sunbeltrentals.com](http://www.sunbeltrentals.com)

Sunbelt Rentals Pump Solutions and Shoring Solutions offers industry-leading expertise and support, customized solutions and more. Regardless of location or project requirements, we're here to keep your job site running safely and smoothly. Whether your job requires temporary bypass pumping, hazardous fluid transfer, dewatering, trench shielding, excavation shoring or anything in between, we've got you covered.

## SUPERCOVER COMPOSITE

### MANHOLE COVERS .....#315

[www.supercover.com](http://www.supercover.com)

SuperCover is a fully bolted down composite manhole ring and cover with built in bolted inflow dish. Only composite manhole cover in industry that has removable threading of nuts for quick and easy repair of stripped nuts. Ultra durable and traffic rated for use in roadways with lightweight design to reduce user injuries and accidents.

## THE STRONG COMPANY INC. ... #432

[www.strongseal.com](http://www.strongseal.com)

The Strong-Seal® System offers a variety of cost-effective engineered cementitious products, specifically designed to rehabilitate municipal concrete and masonry structures and stop inflow, infiltration, and exfiltration. When applied to a minimum of ½" thickness, the Strong-Seal® cementitious mortars are an impervious monolithic liner with compressive and flexural strengths exceeding that of the original structure.

## TRUMBULL MFG .....#604

[www.Trumbull-mfg.com](http://www.Trumbull-mfg.com)

Trumbull Manufacturing composite manhole frames and covers offer superior corrosion resistance to H2S gas and are lighter weight compared to cast iron. Other benefits include AASHTO H20 & H25 traffic rating and O-ring sealed for water infiltration. Trumbull also offers wall sleeves and Link-Seal® for creating and sealing wall penetrations in concrete vaults and other underground boxes.

## UNDERGROUND

### CONSTRUCTION .....#216

[www.ucononline.com](http://www.ucononline.com)

*Underground Construction* is the market leader for in-depth coverage of North American construction and rehabilitation infrastructure; including: water,

sewer, gas distribution, energy pipelines, stormwater, telecommunications and electric transmission and distribution. We are committed to remaining the market's leading publication by continuing our tradition of high editorial standards, the largest independently audited circulation and the best readership rates.

## UNDERGROUND DEVICES INC. ....#725

[www.udevices.com](http://www.udevices.com)

## UNDERGROUND MAGNETICS... #726

[www.umaghd.com](http://www.umaghd.com)

Whether under rails or rebar, the Echo 50XF cuts through passive interference when switched into the sub-kHz frequencies. For highway and river crossings, switch the transmitter into high-power mode. With 16 frequencies ranging from .32kHz up to 41kHz and two power modes, the 50XF is your go-to transmitter.

## UNI-BELL PVC PIPE

### ASSOCIATION .....#510

[www.pvcpa.org](http://www.pvcpa.org)

PVC pipe has been in service in North America for 70+ years, with more than 2 million miles installed. It's available in sizes up to 60" for open-cut installations and up to 36" for trenchless applications. PVC pipe has the lowest break rates, lowest environmental

impact, and one of the highest expected longevities of all commonly used pipe materials in North America.

## UNITED RENTALS ..... #502

[www.unitedrentals.com](http://www.unitedrentals.com)

United Rentals offers the most advanced, cost-effective, and comprehensive suite of trench protective systems and related products, including shoring, shielding, engineered systems, steel plates, confined space safety equipment, and more. Complete with services such as in-house engineering and industry-leading safety training, we have all your project needs covered.

## WARREN ENVIRONMENTAL ..... #404

[www.warrenenviro.com](http://www.warrenenviro.com)

Warren Environmental's epoxy coating blends were developed to handle all types of systems, substrates, and challenging conditions. Visit us at booth #316 to discover how our products deliver the longest, strongest solution for your system while positively impacting the environment.

## WESTLAKE PIPE & FITTINGS (FORMERLY NAPCO PIPE & FITTINGS) ..... #805

[www.napcopipe.com](http://www.napcopipe.com)
